Nonchemical Insect & Fly Control

Made in the USA

Biting Fly Trap

product# BFT-197

Replacement STIKY SLEEVES (10) product# 10-1227-SSR

- ◆ Completely non toxic, odorless and easy to use.
- ◆ Effective in high infestation areas.
- ◆ No baits.
- ◆ No electricity.
- ◆ Catches up to 5,000 flies per trap.

Dr. D.F Williams (USDA) discovered that biting flies are attracted to a special fiberglass panel exposed to direct sunlight. Our Biting Fly Trap uses this same fiberglass in combination with our STIKY SLEEVE to produce a highly effective and inexpensive trap. When placed 70 - 100 feet apart our trap significantly reduces fly populations around beaches, stables, zoos, kennels, golf courses, swimming pools, compost piles and any area where biting flies are a problem. When trap is full simply replace with a fresh STIKY SLEEVE.

Used by:

USDA
National Institutes of Health
Southwest Kansas Research - Kansas
Brookfield Zoo - Illinois
Lake Farm Park - Ohio
Shipwreck Museum - Michigan
Vermont Egg Farm - Vermont
Dept. of Health - Ohio
